Large	16KW (≤160m <sup>2</sup> )	18KW (≤180m <sup>2</sup> )	20KW (≤200m <sup>2</sup> )	24KW (≤240m <sup>2</sup> )
	32KW (≤320m <sup>2</sup> )	36KW (≤360m <sup>2</sup> )		

**The most energy and water efficient solution, and so easy to install!**

# The Most Advanced Electric Boiler Yet!

## Vast range of kWatt options available Remote controllable

The Elwa electric-combi boiler offers a vast range of kWatt options to choose from! This means there is a unit to suit every need - whether it is for heating and shower or heating only or depending on the applications available at the source. Additionally, the alternative sizes and mount options of the units cater to a much wider variety of homes and uses.

## Low noise operation

The boiler works in a manner that reduces any unwanted or loud operating noises. This makes it a very attractive unit for those in building complexes or apartments – you can use your boiler any time with no complaints!

## Intelligent temperature inverter

The inbuilt smart temperature inverter ensures that the water temperature does not vary over the usage time. Unlike other water heaters, the Elwa boiler keeps the temperature constant, no matter how long the water is running.

The large screen, easy control of the boiler allows for the user to set the temperature to always be constant. It is remote controlled by Wi-Fi thermostat. This prevents the risk of scalding hot water, and makes it family friendly by keeping it out of reach of children. Additionally, the real-time control time adjustment function allows for the user to control the boiler from an app on their smartphone. This allows for up to 3 hours heating in advance of use. Getting home to a warm room is now possible without wasting energy throughout the day.

Easy  
Installation

Ranging from  
8kWatt to  
36kWatt\*

Digital Control  
and Display
